

NLP

step = 1

θ

The figure shows a 2D plot with a horizontal axis labeled θ and a vertical axis labeled NLP. An orange curve represents a function. The curve starts at a low value on the left, rises to a peak, then falls to a local minimum, and finally rises again towards the right. A solid black circle is placed at the local minimum of the curve. The text "step = 1" is located in the upper right quadrant of the plot area, above the curve's minimum.
