

NLP

step = 3

θ

The figure shows a 2D plot with a vertical axis labeled 'NLP' and a horizontal axis labeled ' θ '. An orange curve represents a function that is non-convex, featuring a local minimum and a local maximum. A black dot is placed on the curve at its local minimum, with the label ' θ ' positioned directly below it on the horizontal axis. The text 'step = 3' is located in the upper right quadrant of the plot area.
