

NLP

step = 89

θ

The figure shows a 2D plot with a vertical axis labeled 'NLP' and a horizontal axis labeled with the Greek letter θ . An orange curve represents a function, which is non-convex. It starts at a low value on the left, rises to a peak, then falls to a local minimum, and finally rises again towards the right. A solid black dot is placed on the curve at its local minimum. Above this dot, the text 'step = 89' is written in black.
